Informative Letter

The following information is to assist you with weed removal:

Scattered Musk Thistle, Scotch Thistle, Dyen Woad, and Hounds Tongue may be controlled with hand tools if grubbed out repeatedly during the spring and early summer while they are in the seedling or rosette stage and before flowering.

Leafy Spurge, Canadian Thistle, and Morning Glory require repeated herbicide applications.

There are at least four commercial pesticide applicators in Heber Valley which we are aware of and are licensed to apply herbicide to noxious weeds:

- Steve Bonner
  - Phone: (435) 654-2923
- Kurt Day
  - Phone: (435) 654-2341
- Liz Lewis
  - Spring Creek
  - Phone: (435) 654-5145
- Allen Remund
  - Rocky Mt Pest Control
  - Phone: (435) 654-6306

Others may be available in Kamas and the surrounding area.

Thank you.

Steve Smith, CWMA

Wasatch County CWMA Partnership Agreement

I am interested in being a partner with the Wasatch County CWMA for control of noxious weeds in the county as well as specifically on my property located at

_____________________________________________________________________

The noxious weed(s) I would like to control at this site under any or all treatment methods of biological, herbicide, mechanical or cultural control methods are:

_____________________________________________________________________

I plan to cost share one or more of the following resources on my own property and during organized weed work days when possible:

(Time, Labor, Equipment, Sheep, Goats, Herbicide, etc.)

_____________________________________________________________________

(Please return this information to a member of the CWMA Committee)
Wasatch County CWMA Partnership Agreement

Following is a project summary of the work I plan to complete during this growing season starting in the spring:

Number of Acres _______________________________________________________________
Location ________________________________________________________________
Hours Worked ______________________________________________________________
Methods Used ______________________________________________________________
Weed Species ______________________________________________________________
Number of Treatments ______________________________________________________
Desired Result ______________________________________________________________

SIGNATURE ________________________ PHONE ________________________

(Please return this information to a member of the CWMA Committee)
Wasatch County CWMA Partnership Agreement

I understand that some herbicide for noxious weed control will be available to me from Wasatch County CWMA while supplies last.

Use 2, 4-D + Clarity or Tordon 22K on spring or fall rosettes. Use Curtail, Escort, Telar or Transline on young actively growing plants. In addition, mechanical control can be achieved by digging below soil surface under the rosette root crown.

Wallsburg Valley Noxious Weed Grant 2005

$6,000
In September, the Wasatch County CWMA had a successful weed work day coordinating efforts on state and private lands with the cooperation of multiple agencies and CWMA members. Approximately 350 acres were treated and $2,148 spent.
**Activity** | **Planned** | **Accomplished**
